6191116_11

Dear Customer,

Thank you for choosing an AERMEC product. This product is the result of many years of experience and in-depth engineering research, and it is built using top quality materials and advanced technologies.

In addition, the CE mark guarantees that our appliances fully comply with the requirements of the European Machinery Directive in terms of safety.

We constantly monitor the quality level, and as a result AERMEC products are synonymous with Safety, Quality, and Reliability.

Aermec reserves the right to make all modification deemed necessary for improving the product at any time with any modification of technical data.

Thank you again.

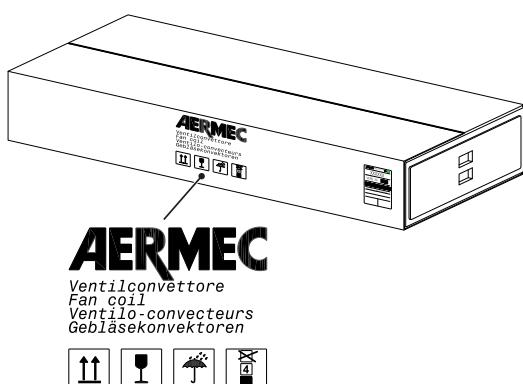

AERMEC S.p.A

3. DESCRIPTION OF THE UNIT

The FCZI series units are fan coil terminals to treat air indoors, both during winter and summer.

The FCZI fan coil combines high technological and functional features that make it ideal to heat and cool all environments. The supply of heated or cooled air is immediate and distributed throughout the room.

FCZI generates heat if included in a heating system with boiler or heat pump. However, it may also be used in the summer as an air conditioner, if the heating system has a water chiller.

The fan coil unit is designed to achieve maximum compliance with the rules accident prevention. The inverter motor allows the user to adapt to the real demands of the internal environment without temperature fluctuations. The basin and the augers of the inspected fans allow you to perform a thorough cleaning of the internal parts also. a particularly quiet centrifugal fan assembly. Water connections reversibility during installation

The **FCZI** fan coil has been designed to meet every system requirement, thanks also to the accessories supplied.

In particular, the fact that the unit can be integrated in the **VMF** system gives you control over the individual fan coil with accessories up to the management of the fan coil inserted in complex networks.

VMF (VARIABLE MULTIFLOW)

VMF (Variable Multi Flow) is the system able to intelligently manage a complete hydronic system, then composed of a cold/heat pump, a boiler and a network of fan coils (multi-speed or continuous speed modulation) arranged in zones are divided (up to 64), the circulation pumps (up to 12) and the heat recovery with the air quality sensor (up to 3), performance optimizations in air conditioning and heating ensure comfort and energy savings.

VMF

2. FEATURES

Drawing from its wide experience in the field of fan coils, Aermec presents the new FCZI series, where the elegant design goes hand in hand with cutting-edge performance in terms of low noise and energy savings.

They can be installed on any system with 2/4 pipes and it fits with any heat generator even at low temperatures, and thanks to varied versions and settings, it is easy to pick the ideal solution for any need.

Versions without installed controller,

Vertical or horizontal installation:

FCZI_U

FCZ_UF

Vertical installation:

FCZI_AS

FCZ_AF

With installed controller,

Vertical installation:

FCZI_DT

FCZI_D

FCZI_ACT

Versions without control in built,

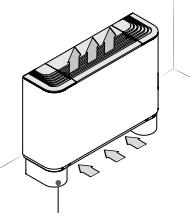

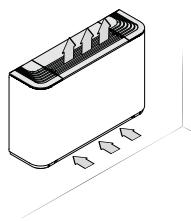

Vertical or horizontal installation:

FCZI_P

- Coat RAL9003, RAL 7047 Head
- Brushless motor continuously variable 0-100% of the speed, to ensure the best performance with very low sound level
- Metallic protective cabinet with rustproof polyester paint
- Adjustable air delivery grill with the fan coil switched off by closing the air distribution grid, for U versions
- Low pressure drop across heat exchangers
- Easy installation and maintenance
- Air filter class Coarse 25% for all versions easy to pull out and clean. In the APC version, air purification is guaranteed by the Cold Plasma purifier.
- Water connections reversibility during installation

4. DESCRIPTION OF VERSIONS

With fixed grille (vertical free-standing) - A

Matching feet
(accessory)

- **FCZ_AS**

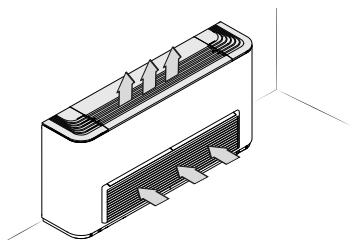

- Without installed controller
- Compatible with VMF system

- **FCZ_ACT**

- With electronic controller (for 2 pipe systems)

Vertical installation only

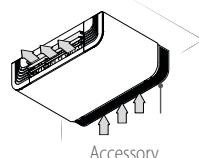

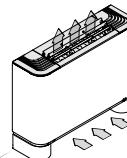

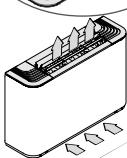

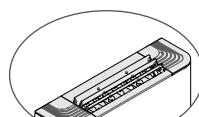

- For 2/4 pipe systems

- **FCZI_AF**

- Without installed controller
- Compatible with VMF system
- Front intake

With adjustable/fixed grille (Universal) - U

Accessory
GA

- **FCZI_U**

- Without installed controller
- Compatible with VMF system
- Adjustable air distribution grille

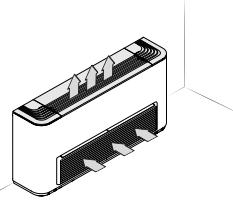

Single for size 2-3

Three independent for sizes 4-5-7

With the flap completely closed the unit is off

Vertical or horizontal installation

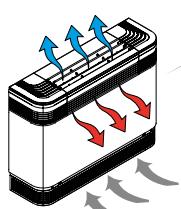

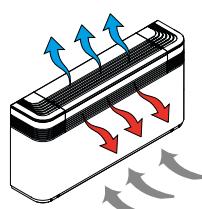

- For 2/4 pipe systems

- **FCZI_UF**

- Without installed controller
- Compatible with VMF system
- Adjustable grille front intake louver

With double flow (Dualjet) - D

Dualjet, unique to Aermec, offers notably improved seasonal comfort by directing the air flow according to the season.

In winter warm air is directed towards the floor; in summer cool air is directed towards the ceiling.

- **FCZI_D** With installed controller

- **FCZI_DT** With installed controller T-Touch

- **FCZI_DS:** Version without control on the machine, it is mandatory to use a thermostat to manage the change over on the air side through the microswitch, it is recommended to use Aermec thermostats (TX-AER503IR-VMF-E19)

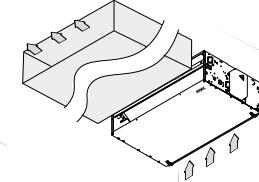

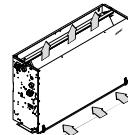

FCZ_D units are compatible with the VMF system, in this case you will need to contact the headquarter

- You can change the air supply orientation, frontal or from above, by acting directly on the adjustable grid.

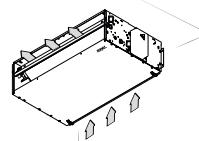

Only vertical installation

- For 2 pipe system (4 pipe system with VCF_X4 , VMF system or FCZI_DT)

Vertical

Duct

Horizontal

- **FCZI_P**

- wall/ceiling mounted without cabinet

Vertical or horizontal installation

- For 2/4 pipe system

* In the standard configuration it is not static pressure available. Should it be necessary for ducted installations, we must act on the dip switch on the motor. For further concerning refer to the technical documentation.

5. CONFIGURATOR

By appropriately combining the variety of options available, every model can be configured in order to meet all specific system requirements.

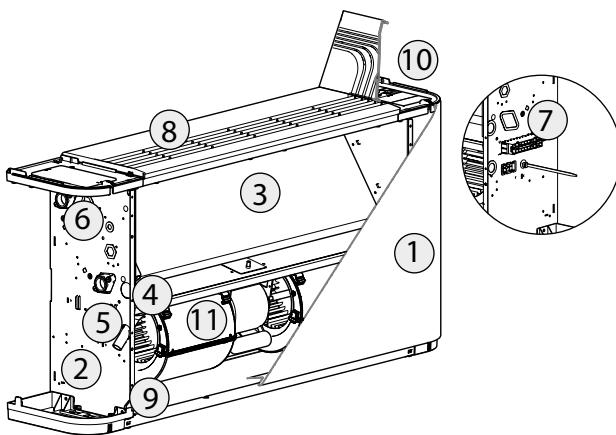

Field Code**1,2,3,4 FCZI****5 Size**

2-3-4-5-7-9

6 Main coil**0** Standard**5** Oversized (1)**7 Supplementary coil****0** Without coil**1** Standard**2** Oversized**8,9,10 Versions****D** Dualjet with installed controller**DT** With installed controller T-Touch**DS** Dualjet without on-board control**AS** Free standing without installed switch**AF** Free standing without switch Front intake louver**ACT** Free standing with electronic controller**U** Universal with adjustable grille, without installed controller**UF** Universal with adjustable grille, without installed controller front intake louver**P** Wall/ceiling mounted without cabinet**PR** Wall/ceiling mounted without cabinet and hydraulic connections to the right

(1) Oversized coil "5" does not allow the installation of the supplementary coil "1 or 2"

6. MAIN COMPONENTS

1- Mobile di copertura (RAL 9003)

2- Struttura Portante

3- Batteria di scambio termico

4 - Bacinella Raccolta Condensa

5 - Scarico Condensa

6 - Collegamenti Idraulici

7 - Collegamenti Elettrici

8 - Griglia di mandata (RAL7047)

9 - Sezione Filtrante

10 - Alloggio del pannello comandi

11 - Gruppo Ventilazione

CABINET

RAL9003 color cloak

Outlet grilles RAL7047 color

The casing is made of galvanized steel and polyester powder coated to ensure high resistance to rust and corrosion.

Clogs (accessory), for units with housing, are made of plastic material RAL9003 color.

BEARING STRUCTURE

It is made of galvanized sheet steel of adequate thickness. In the rear part has the holes for fixing to the wall of the appliance. For models without cabinet is provided, mounted on the front cover panel of the fan assembly. Clogs (accessory), for ducted units are made of galvanized sheet steel.

HEAT EXCHANGER

Coil with copper tube and aluminum fins blocked by mechanical expansion of the tubes. The manifolds are equipped with female fittings and, of air vents in the upper part of the battery vents and water in the bottom of the battery

2 pipe systems:

- Standard main battery (reversible on site).

- Increased the main battery (reversible on site).

4 pipe systems:

- With standard main battery coupled to accessories VCZ_X4R valve series.

(Reversible on site VCZ_X4L).

- Main increased battery coupled to accessories valve series VCZ_X4R.

(Reversible on site VCZ_X4L).

- With standard main battery coupled to 'battery accessory BV.

(Reversible on site).

- With secondary battery does not reversible in caqntiere but with right connections (to be specified when ordering)

BOWLS CONDENSATION

The fan coil only allow vertical installation, they are equipped with a condensate drain pan.

The fan coils that also allow horizontal installation are provided with a second basin.

All condensate collection basins are thermally insulated and have the dual exhaust to the right and to the left.

Unloading unused must be sealed.

CONDENSATE DRAIN

Each fan coil, installed to operate in the cooling mode, must be connected to a suitably sized exhaust system condensation with an appropriate slope to allow the flow of water.

HYDRAULIC CONNECTIONS

Water connections, usually positioned in the left side, are with couplings.

Water connections must always be positioned on the opposite side to the electrical connections.

It has the option to rotate the battery in the pipeline (reversible battery), excluding versions with dual circuit battery (NOT reversible) which must be ordered by indicating the side of the attack.

ELECTRICAL CONNECTIONS

On the opposite side to the side of the water connections, usually is a terminal block for connection to the electricity grid.

The fan must always be connected to a grounding wire.

SUPPLY GRID

Made of plastic material RAL7047 color and can be fixed fins or movable depending on the model chosen.

For fan convectors with the delivery grille with adjustable blades, pay attention to the connection with the micro-switch on the command opening levers.

With the flaps closed the ventilation is inhibited.

FILTER SECTION

Air filter class Coarse 25% for all versions easy to pull out and clean.

In the APC version, air purification is guaranteed by the Cold Plasma purifier.

CONTROL PANEL

The command panel, in versions which provide for the installation on board, is housed in the cylinder head of the fan coil, under the right cover and can be protected from tampering, by locking with a screw of the cover flap.

In versions which provide the control panel as an accessory, it can be installed on the fan coil or wall.

In the hanging version the control panel (accessory) can only be installed on the wall.

The fan coils AERMEC in versions without control panel can be integrated in the VMF System.

To see the choice of control panels features in the chapter "Accessories."

FAN UNIT

It consists of double inlet centrifugal fans with blades developed in length to obtain high flow rate with low number of revolutions.

The electric motor "brushless with Hall probes" used in fan coil modulating FCZI AERMEC presents enormous advantages compared to conventional AC motors, and hybrid motors and inverters (no Hall sensor) normally used on other fan coils modulating:

- Low wear
- Ability to adjust in a precise and continuous rotation speed (0-100%)
- Increased energy efficiency
- Greater durability and reliability
- Low magnetic noise
- Continuous control of the rotor position, this implies increased efficiency and guaranteed inspired and controlled
- Guaranteed minimum speed 90 rpm (for thermodynamic reasons this limit has been increased to 200 rpm).

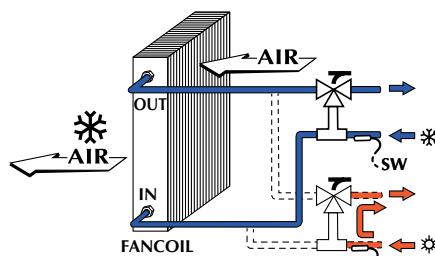

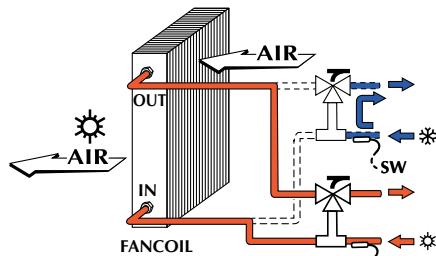

7. EXAMPLES OF SYSTEM CONFIGURATIONS WITH FCZ

Key:

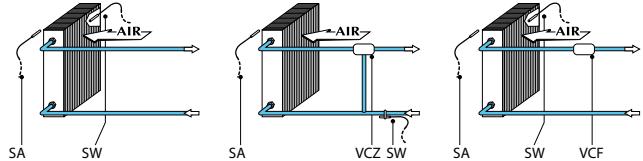

SW Water temperature probe
 VCF Solenoid valve (Heating/ Cooling)
 VC Solenoid valve (Heating),
 VF Solenoid valve (Cooling)

SA Ambient temperature probe
 V3,V2,V1 Maximum, Medium, Minimum speed of the fan
 RX Heater

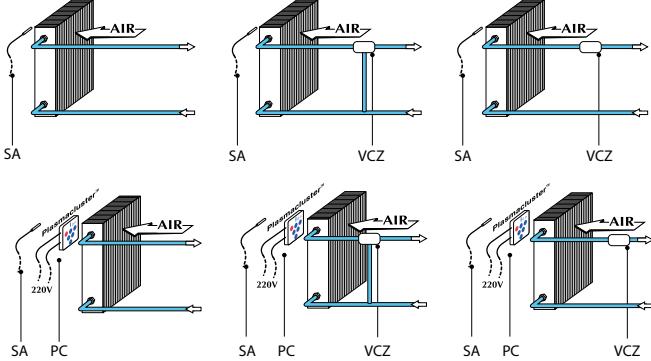

4-pipe system with standard coil and VCF_X4 valve

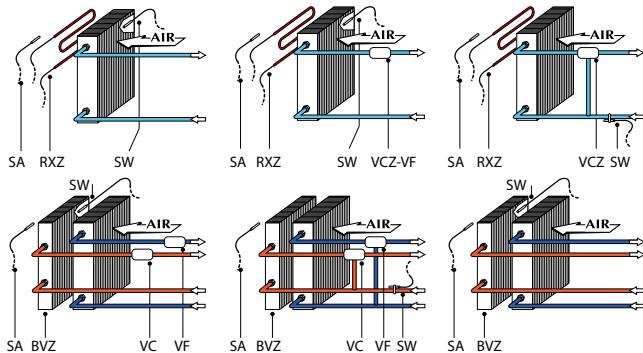

2-pipe system with water probe

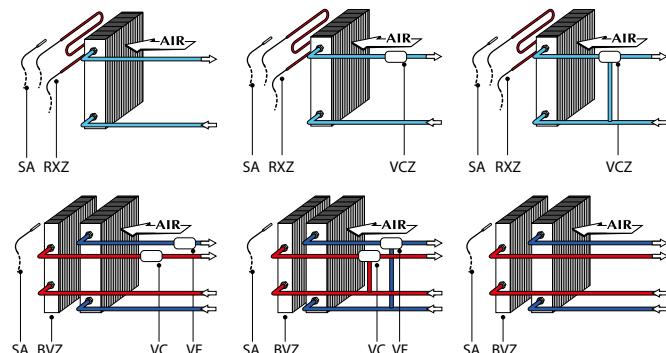

2-pipe system without water probe

4-pipe system with water probe

4-pipe system without water probe

OPERATING ENVIRONMENT

The units are designed for installation in closed environments in conditions of 'urban', non-marine atmosphere with non-corrosive and non-dusty characteristics. Under no circumstances the following concentrations of pollutants in the air, in which the unit must operate, shall be exceeded:

SO_2	<0,02 ppm
H_2S	<0,02 ppm
NO, NO_2	<1 ppm
NH_3	<6 ppm
N_2O	<0,25 ppm

The unit should not be installed in locations characterized by the presence of flammable gases or acidic or alkaline substances.

Otherwise the coils and the internal components of the equipment could suffer serious and irreparable damage from corrosion.

WARNINGS FOR THE QUALITY OF THE WATER CIRCULATING IN THE COILS

It is recommended to perform an analysis of the water circulating in the coil focusing on the research of the possible presence of bacteria (detection of iron bacteria and micro-organisms that can produce H₂S or chemically reduce sulphates) and on the chemical composition of the water, to prevent corrosion and fouling inside the tubes. The water circuit must be supplied and replenished with treated water that does not exceed the threshold levels indicated below.

Total hardness in mmol/l	$\text{l} < \text{mmol/l} < 1,5$
Chlorides [Cl ⁻]	< 10 mg/litre
Sulphates [SO ₄ ²⁻]	< 30 mg/litre
Nitrates [NO ₃ ⁻]	= 0 mg/litre
Dissolved iron	< 0,5 mg/litre
Dissolved oxygen	$4 < [\text{O}_2] < 9$ mg/litre
Carbon dioxide [CO ₂]	< 30 mg/litre
Resistivity	$20 \text{ Ohm}\cdot\text{m} < \text{Resistivity} < 50 \text{ Ohm}\cdot\text{m}$
pH	$6,9 < \text{pH} < 8$

Maximum water flow rate (Qw)	l/h	700	700	700	700	1200

Type tests carried out at atmospheric pressure at minimum selectable speed.

WATER TEMPERATURE

In order to prevent air stratification in the environment and thus have a better mixture, the fan coil should not be supplied with water that is hotter than 65°C.

Using water at a very high temperature can cause cracking due to the heat expansion of the elements (plastic and metal), however, this does not cause damage to the unit unless the maximum operating temperature is exceeded.

MINIMUM AVERAGE WATER TEMPERATURE

If the fan coil runs continuously in cooling mode in an environment with high relative humidity, condensate may form on the air flow.

This condensate could drip onto the floor and onto any underlying objects. To prevent condensation phenomena on the external structure of the appliance with the fan running, the average water temperature must not drop below the limits indicated in the table. These limits depend on the temperature and humidity conditions of the room air.

These limits refer to operation with the fan running at minimum speed. Condensation may form in the event the fan is off for a prolonged period and cold water flows in the coil; therefore, we recommend installing the 3-way valve (accessory).

Room temperature wet bulb (Ta) °C	Dry bulb temperature of the ambient air (Ta) °C

13. COOLING POWER YIELDED

The table shows the sensitive and total cooling capacities at maximum speed depending on the temperature of the water entering, of its heat drop and temperature of the air with dry bulb and wet bulb respectively for sensitive yield and total yield for standard coil versions. The performances at medium and minimum speed are obtained by multiplying the values in the table by the corrective factors indicated for each speed.

NB: The yield values marked in bold indicate the nominal value.

Key:

T_w [°C] = Inlet water temperature.

T_a B.U. [°C] = Inlet air temperature with wet bulb.

T_a B.S. [°C] = Inlet air temperature with dry bulb.

P_c [w] = Total cooling capacity.

P_s [w] = Sensitive cooling capacity.

Q_v [m³/h] = Air flow rate.

H = maximum speed.

M = medium speed.

L = minimum speed.

NB: The yield values marked in bold indicate the nominal value.

To calculate the cooling capacity yielded, the values shown in the table must be multiplied by the corrective factors referred to the different speeds.

Sensitive yield values greater than the total yield indicate that cooling occurs without dehumidification.

In this case take into account the sensitive yield values only.

The cooling capacities of the table must be multiplied by the following corrective factors:

	200	201	202	250	300	301	302	350	400	401	402	450
Total cooling capacity corrective values	H	1	1	1	1	1	1	1	1	1	1	1
	M	0,80	0,80	0,80	0,80	0,82	0,82	0,82	0,81	0,81	0,81	0,80
	L	0,56	0,56	0,56	0,55	0,63	0,63	0,63	0,62	0,61	0,61	0,60
Sensitive cooling capacity corrective values	H	1	1	1	1	1	1	1	1	1	1	1
	M	0,79	0,79	0,79	0,79	0,81	0,81	0,81	0,81	0,80	0,80	0,79
	L	0,53	0,53	0,53	0,52	0,62	0,62	0,62	0,61	0,60	0,60	0,58

The cooling capacities of the table must be multiplied by the following corrective factors:

	500	501	502	550	700	701	702	750	900	901	950
Total cooling capacity corrective values	H	1	1	1	1	1	1	1	1	1	1

HEATING POWER (MODELS WITH STANDARD BATTERY)

The heating power yielded by the coils (standard or larger) are stated in table format and are referred to the maximum speed, based on the water flow and on the difference of temperature between water entering and air entering. The performances at medium and minimum speed may be displayed through the selection software.

NB: The yield values marked in bold indicate the nominal value.

Key:

T_w [°C] = Inlet water temperature.

T_{a B.S.} [°C] = Inlet air temperature with dry bulb.

Ph [W] = Heating power yielded.

H = maximum speed.

M = medium speed.

L = minimum speed.

The cooling capacities of the table must be multiplied by the following corrective factors:

		200	250	300	350	400	450	500	550	700	750	900	950
Thermal power corrective factors	H	1	1	1	1	1	1	1	1	1	1	1	1
	M	0,80	0,78	0,81	0,80	0,80	0,80	0,86	0,85	0,89	0,90	0,88	0,84
	L	0,55	0,54	0,63	0,61	0,60	0,58	0,62	0,60	0,74	0,73	0,71	0,65

14. PRESSURE DROPS WITH STANDARD COIL IN COOLING-

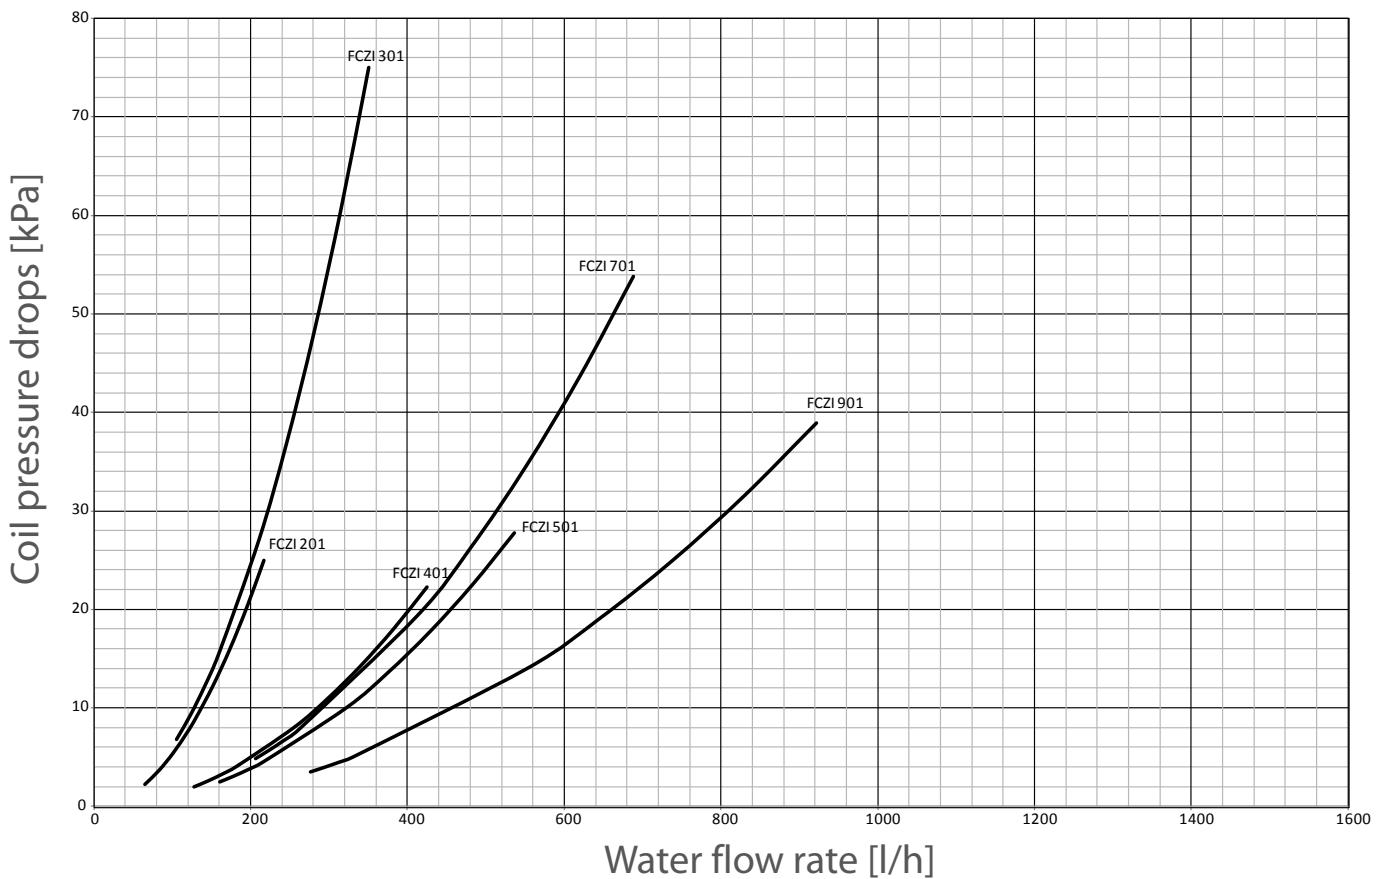

Water flow rate [l/h]

Water flow rate [l/h]

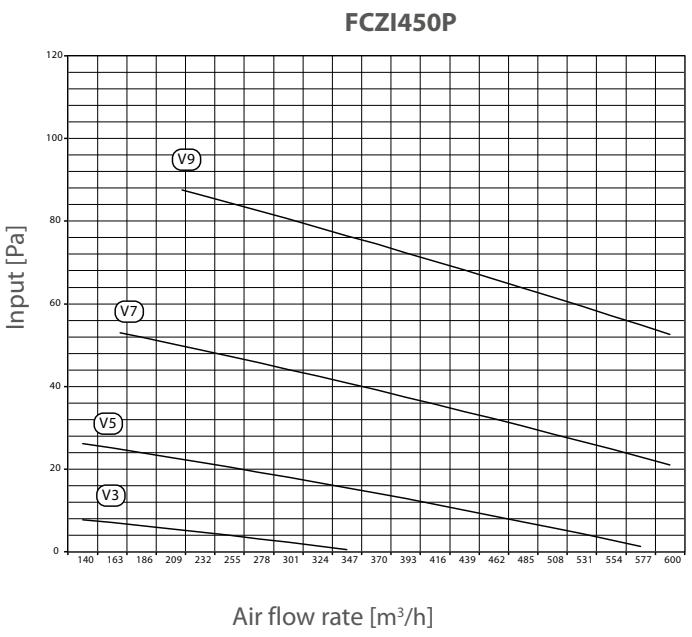

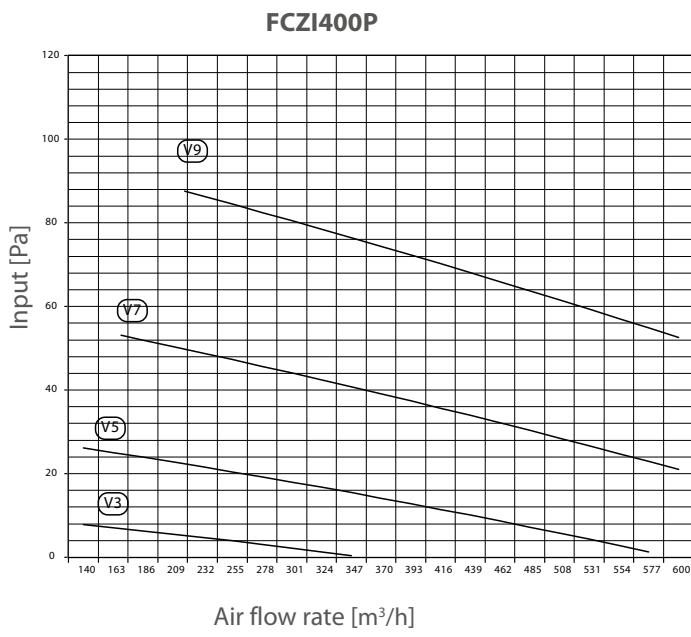

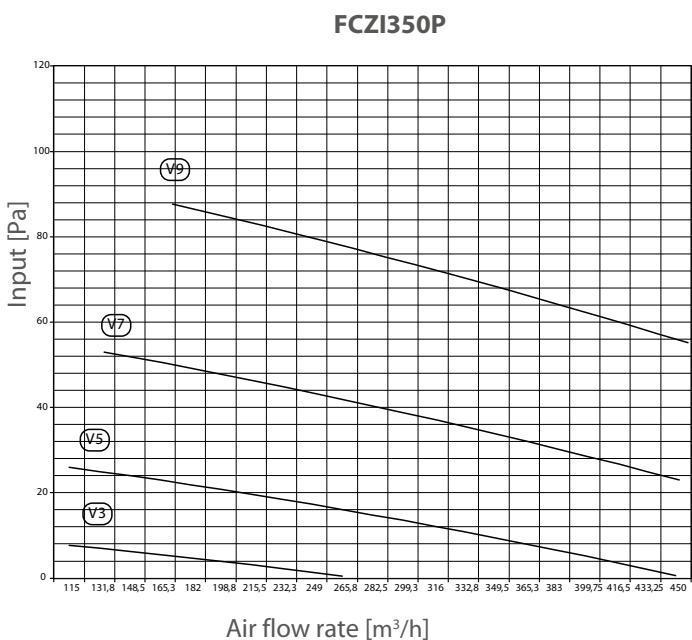

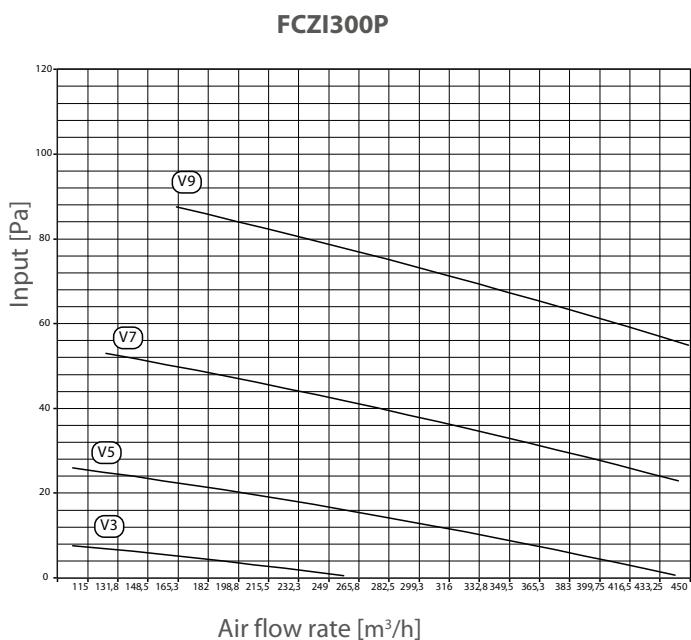

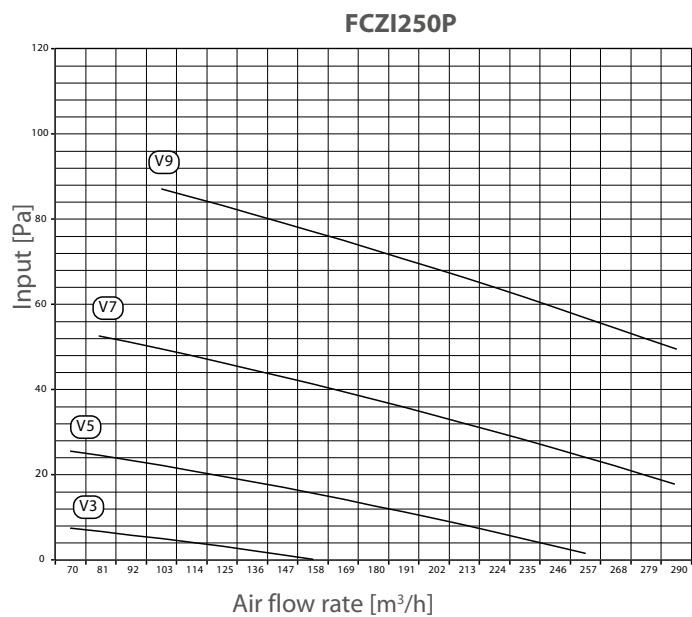

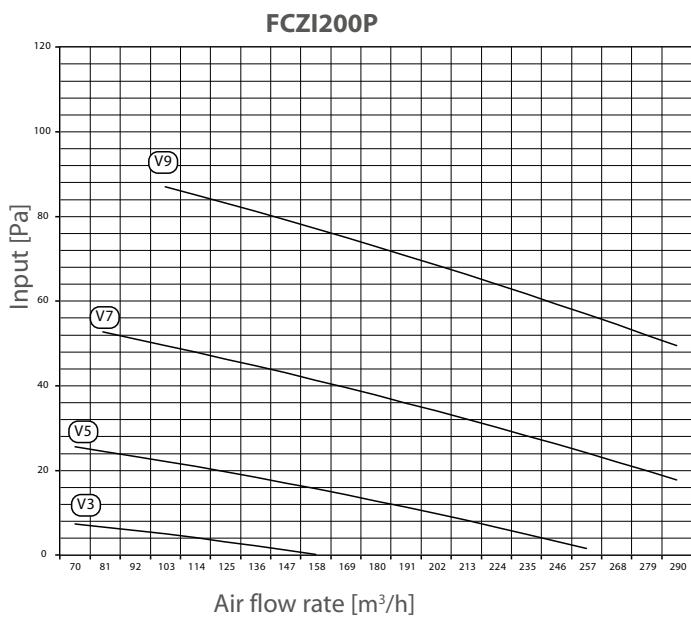

15. PRESSURE DROP MAIN BATTERY IN HEATING

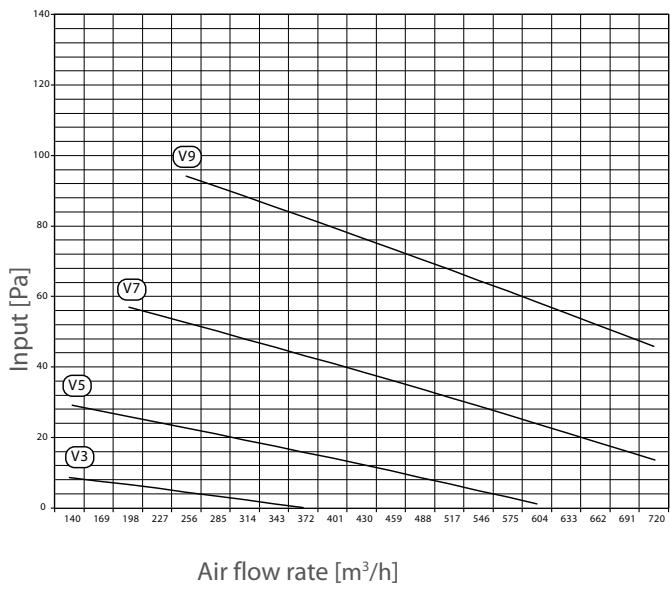

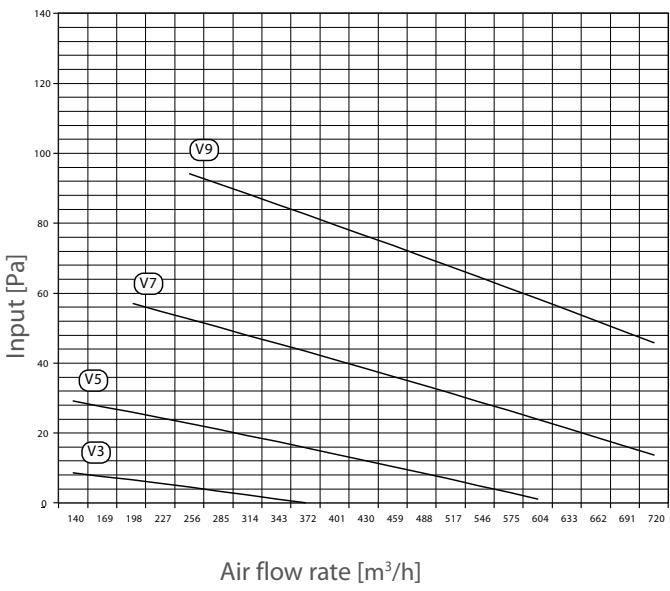

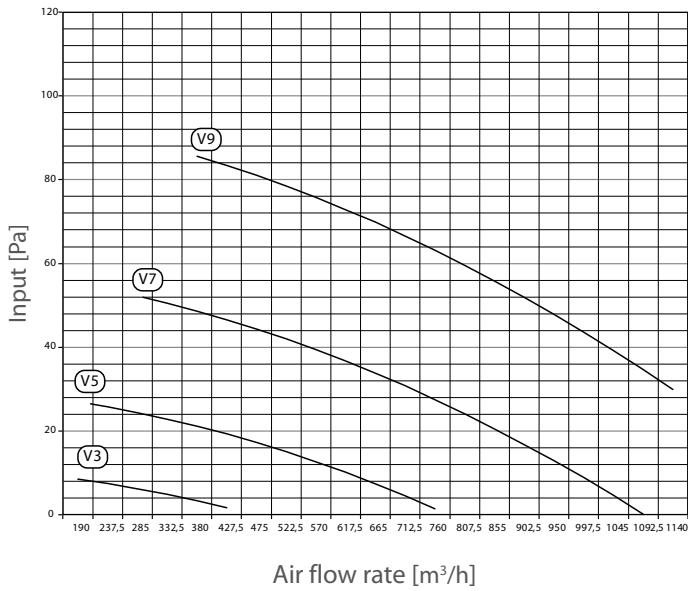

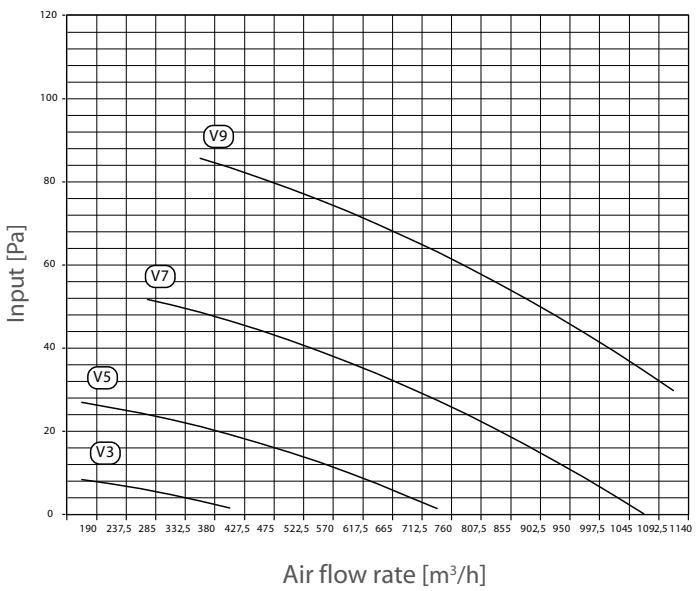

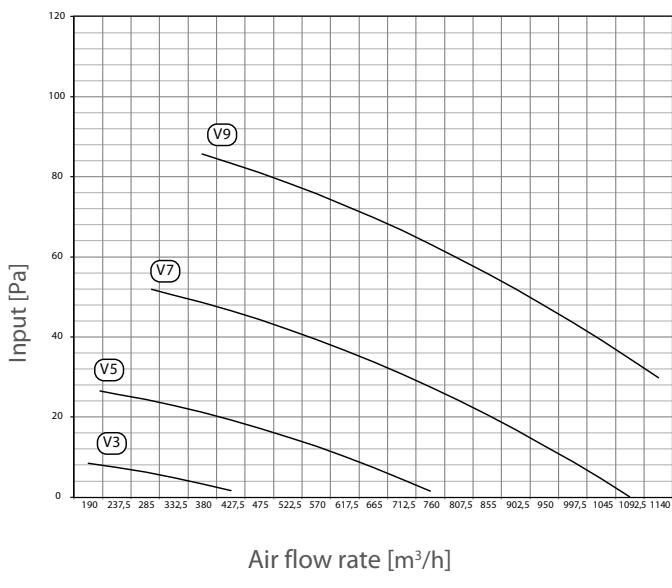

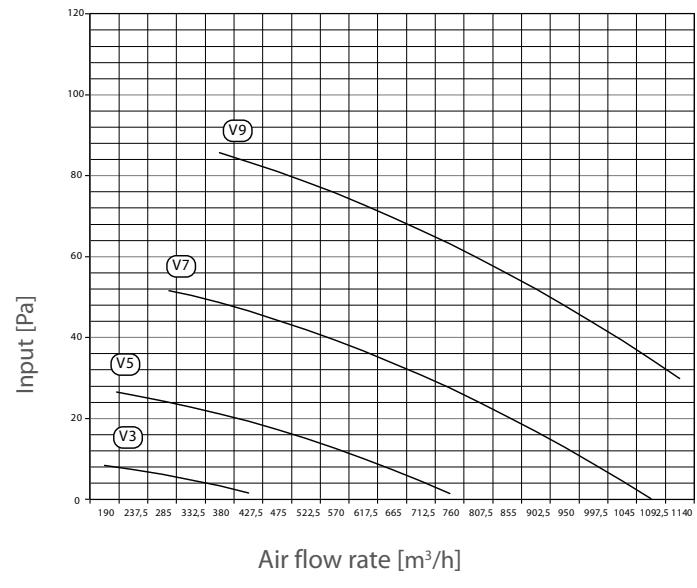

The pressure drops in the previous diagram refer to an average water temperature of 10 °C. The following table shows the correction to be applied to the pressure drops as the average water temperature varies.

Average water temperature	°C	5	10	15	20	50	60	70
Multiplication coefficient		1,03	1	0,96	0,91	0,78	0,75	0,72

16. FCZI P FLOW STATIC PRESSURE

FCZI500P**FCZI550P****FCZI700P****FCZI750P****FCZI900P****FCZI950P**

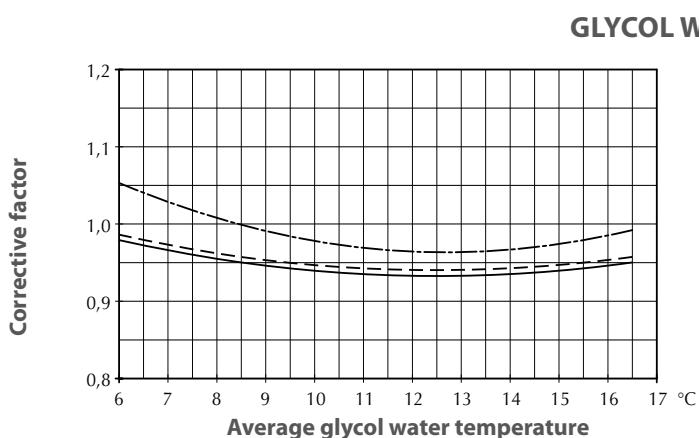

Use the appropriate selection program to check additional desired speeds.

17. CORRECTIVE FACTORS ETHYLENE GLYCOL

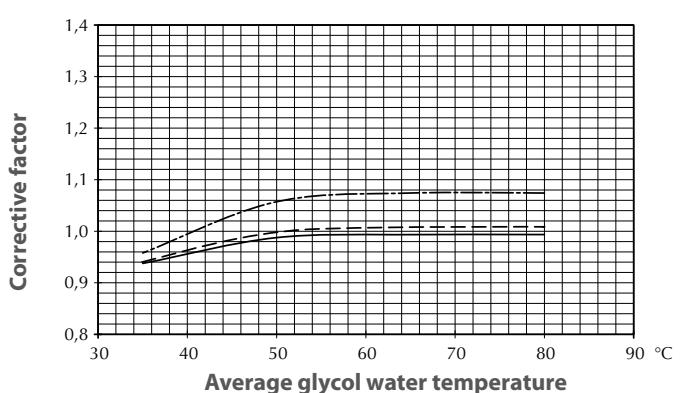

Key:

- · — Pressure drops
- · — Flow rate
- Yield

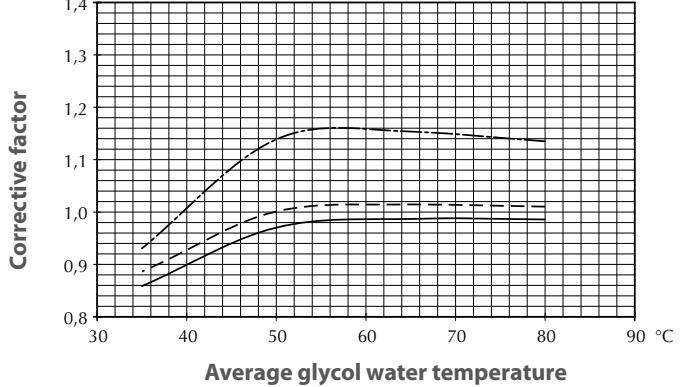

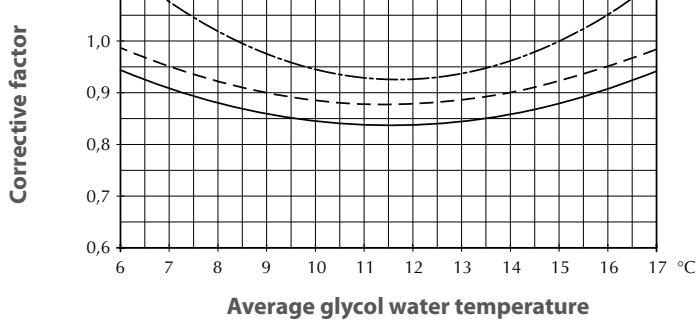

IN COOLING MODE

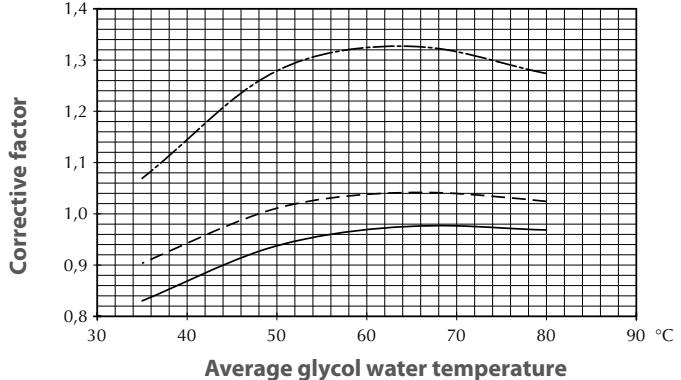

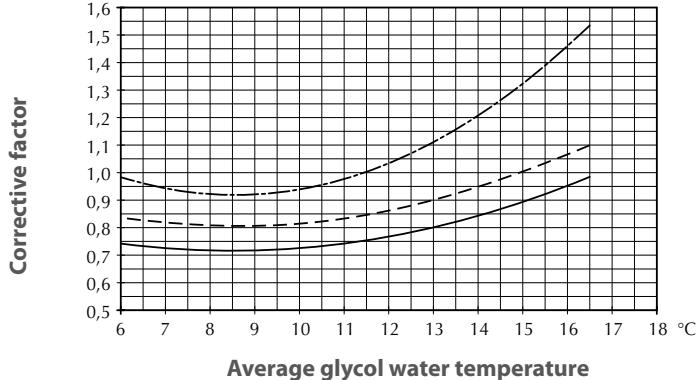

IN HEATING MODE

GLYCOL WATER AT 20%

GLYCOL WATER AT 35%

(E) = Eurovent certified performance

Sound pressure level (weighted A) measured in an environment with volume V= 85 m³ , reverberation time t= 0.5s , directionality factor Q= 2 , distance r= 2.5m.

19. COMPATIBILITY OF ACCESSORIES FCZ CABINET VERSIONS

ACCESSORIES

Control panels

AER503IR: Flush-mounting thermostat with backlit display, capacitive keypad and infrared receiver, for controlling both brushless fan coils and those with an asynchronous motor. In 2-pipe systems, the thermostat can control standard fan coils or those equipped with an electric heater, with air purifying devices (Cold Plasma and germicidal lamp), with radiant plate or with FCZ-D twin delivery (Dualjet). In addition, it can control systems with radiant panels or mixed (fan coil and radiant floor) systems. Being equipped with an infrared receiver, it can, in turn, be controlled by the VMF-IR remote control.

PRO503: Wall box for AER503IR and VMF-E4 thermostats.

SAS5: air probe kit (L = 15 m) with probe-locking cable grommet.

SW3: Water probe (L = 2.5 m) for controlling the minimum and maximum and to allow automatic seasonal switching for electronic thermostats fitted with water side changeover.

SW5: water probe kit (L = 15m) with probe-holder connection point, fixing clip and probe-holder from heat exchanger.

T-TOUCH-I: Touch control on board the machine, for controlling fan coils with brushless motors. In 2-pipe systems, it can control standard fan coils or those equipped with an electric heater, with air purifying devices or with FCZI-D twin delivery (Dualjet). In 4-pipe systems, only standard fan coils.

TX: Wall-mounting thermostat for controlling either brushless fan coils or those with asynchronous motors for 2/4 pipe. In 2-pipe systems, the thermostat can control standard fan coils or those equipped with an electric heater, with air purifying devices, radiant plate or FCZ-D twin delivery (Dualjet).

TXBI: On board thermostat for fan coils 2/4 pipes of the FCZI series with brushless motor, complete with water probe and air probe to be positioned in the dedicated housings. The thermostat in 2-pipe systems it can control standard fan coils or those equipped with electrical resistors, with purification devices (Cold Plasma and germicidal lamp) with the radiating plate or with double flow FCZI-D (Dualjet).

VMF system

VMF-E19I: Thermostat to be secured to the side of the fan coil, fitted as standard with an air probe and a water probe, it controls systems with 2 pipes, 4 pipes, 2 pipes + Cold Plasma, 2 pipes + UV lamps, 2 pipes + Heating element. Equipped with an external contact to be used as a remote ON-OFF at low voltage. By means of 2-wire serial communication, this thermostat allows for the creation of a single fan coil area (1 master + maximum 5 slaves). Compared to the previous model, thanks to a different dip switch configuration, it allows implementing new features:In systems with two pipes and a heating element - the latter can be activated as a complete replacement - allowing you to warm the environment exclusively with this accessory - Dualjet features are available in standard software and can be set via dip switch - Economy contact/presence sensor - Additional water sensor for overall control in 4-pipe systems (with VMF-SW1 accessory) - Serial RS485, ModBus RTU protocol, for centralised control - Possibility of inserting expansion boards for future developments. The VMF-E19 accessory must be therefore used in masters in the presence of multiple zones, or for communication with the chiller/heat pump - Compatibility with the VMF-IO accessory - Compatibility with VMF-LON expansion board.The thermostat is protected by a fuse.

VMF-E2Z: User interface on the fan coil, with two selectors, one for temperature and the other for speed control; to be combined with accessories VMF-E0, VMF-E19, VMF-E19I.

VMF-E3: Wall mounted user interface, to be combined with accessories VMF-E19, VMF-E19I, VMF-E0X with grids GLF_N/M and GLL_N, can be controlled with VMF-IR control.

VMF-E4X: A wall-mounted user interface to be combined with VMF-E19, VMF-E19I, VMF-E24 ed VMF-E24I accessories. Featuring an innovative, extremely slim and cost-effective design, it allows running functions via a capacitive touchscreen keyboard with LCD display. You can choose to adjust the environment temperature with a panel-mounted sensor probe (standard), or with the VMF-E19/E19I probe, or through mediated reading. It also enables the activation of an air purifier (Cold Plasma/ UV lamp) and a heating element. Light grey front panel PANTONE COOL GRAY 1C.

VMF-IO: Manage the unit exclusively from a centralized VMF control panel without area control panel.

VMF-IR: User interface compatible with the AER503IR, VMF-E3 thermostat and with all the grids of cassettes equipped with the infrared receiver compatible with the VMF system.

VMF-LON: Expansion allowing the thermostat to interface with BMS systems that use the LON protocol.

VMF-SW: Water probe (L = 2.5m) used if required in place of the standard unit supplied with the VMF-E0X, VMF-E19 and VMF-E19I thermostats for mounting it upstream of the valve

VMF-SW1: Additional water probe (L = 2.5m) to be used if required for 4-pipe systems with the VMF-E19 and VMF-E19I thermostats for maximum control in the cold range

VMHI: The VMHI panel can be used as a user interface for VMF-E0X/E19/E19I thermostats, GLFxN/M or GLLxN grids, or as an interface for the MZC system. What determines the function to be performed by the user interface is determined by its correct parametrisation and by following the electrical connections between interface and thermostat or interface and plenum.

Water valves

VCZ_X: 3-way valve kit for single-coil fan coil, RH connections, (VCZ_X4R) or LH (VCZ_X4L) for 4-pipe systems. With totally separate "heating" and "cooling" circuits. This kit consists of two 3-way insulated valves and four connections, complete with electrothermal actuators, insulating shells for the valves, and the relative hydraulic couplings. X4L version for fan coils with LH connections, and X4R for fan coils with RH connections. 230V~50Hz power supply.

VCZ: 3-way motorised valve kit. The kit consists of a valve with its insulating shell, an actuator and the relative pipe fittings. It can be installed on fan coils with both right and left connections. If the valve is combined with the BCZ5 or BCZ6 condensate drain pan, to ensure a better housing it is possible to remove the 3-way insulating shell. The kit consists of a valve with its insulating shell, an actuator and the relative pipe fittings. It can be installed on fan coils with both right and left connections. If the valve is combined with the BCZ5 or BCZ6 condensate drain pan, to ensure a better housing it is possible to remove the insulating shell.

VCF44 - 45 - for the secondary coil: The 3-way motorised valve kit for the secondary coil heat only. The kit consists of a valve with its insulating shell, actuator and relevant water fittings; it is suitable to be installed on the fan coils with right and left water connections.

VCZD: 2-way motorised valve kit. The kit consists of a valve, an actuator and the relative pipe fittings. It can be installed on fan coils with both right and left connections.

VJP: Control and balancing combination valve for 2 and 4 pipe systems to install outside the unit, supplied without fittings and hydraulic components. The valve, which can guarantee a constant water flow rate in the terminal, within its operating range.

Additional coil

BV: Single row hot water heat exchanger.

Installation accessories

PCZ: Metal panel for the unit rear closing. SPCZ brackets are necessary to fix floor standing fan coils.

GA: Lower intake grille for encapsulated fan coils. Can also be used in wall-mounted or floor installations, the FIKIT accessory is needed only in the case of floor installation.

FIKIT: Metal supports for vertical installation of the GA grille.

DSCZ4: Condensate drainage device.

BCZ: Condensate drip. If the valve is paired with the BCZ5 or BCZ6 condensate drip tray, the insulating shell can be removed to ensure better housing.

AMP: Wall mounting kit

ZXZ: Pair of stylish and structural feet.

20. COMPATIBILITY ACCESSORIES DUCT FCZ

Control panels

AER503IR: Flush-mounting thermostat with backlit display, capacitive keypad and infrared receiver, for controlling both brushless fan coils and those with an asynchronous motor. In 2-pipe systems, the thermostat can control standard fan coils or those equipped with an electric heater, with air purifying devices (Cold Plasma and germicidal lamp), with radiant plate or with FCZ-D twin delivery (Dualjet). In addition, it can control systems with radiant panels or mixed (fan coil and radiant floor) systems. Being equipped with an infrared receiver, it can, in turn, be controlled by the VMF-IR remote control.

PRO503: Wall box for AER503IR and VMF-E4 thermostats.

PXAI: Thermostat on the machine for controlling the fan coils (both with asynchronous and brushless motors), complete with water and air probes to be positioned in the relative seats, and a plastic support to fix it on the side of the unit. In 2-pipe systems, the thermostat can control standard fan coils or those equipped with an electric heater, purifier devices (Cold Plasma and germicidal lamp), or radiant plate.

SAS: air probe kit (L = 15 m) with probe-locking cable grommet.

SW3: Water probe (L = 2.5 m) for controlling the minimum and maximum and to allow automatic seasonal switching for electronic thermostats fitted with water side change-over.

SW5: water probe kit (L = 15m) with probe-holder connection point, fixing clip and probe-holder from heat exchanger.

TX: Wall-mounting thermostat for controlling either brushless fan coils or those with asynchronous motors for 2/4 pipe. In 2-pipe systems, the thermostat can control standard fan coils or those equipped with an electric heater, with air purifying devices, radiant plate or FCZ-D twin delivery (Dualjet).

VMF system

VMF-E19I: Thermostat for inverter unit to be fixed on the side of the fan coil, fitted as standard with an air and water probe.

VMF-E3: Wall mounted user interface, to be combined with accessories VMF-E19, VMF-E19I, VMF-EOX with grids GLF_N/M and GLL_N, can be controlled with VMF-IR control.

VMF-E4DX: Wall-mounted user interface. Grey front panel PANTONE 425C (METAL).

VMF-E4X: Wall-mounted user interface. Light grey front panel PANTONE COOL GRAY 1C.

VMF-IR: User interface compatible with the AER503IR, VMF-E3 thermostat and with all the grids of cassettes equipped with the infrared receiver compatible with the VMF system.

VMF-SW: Water probe (L = 2.5m) used if required in place of the standard unit supplied with the VMF-EOX, VMF-E19 and VMF-E19I thermostats for mounting it upstream of the valve

VMF-SW1: Additional water probe (L = 2.5m) to be used if required for 4-pipe systems with the VMF-E19 and VMF-E19I thermostats for maximum control in the cold range

Water valves

VCZ_X: 3-way valve kit for single-coil fan coil, RH connections, (VCZ_X4R) or LH (VCZ_X4L) for 4-pipe systems. With totally separate "heating" and "cooling" circuits. This kit consists of two 3-way insulated valves and four connections, complete with electro-thermal actuators, insulating shells for the valves, and the relative hydraulic couplings. X4L version for fan coils with LH connections, and X4R for fan coils with RH connections. 230V~50Hz power supply.

VCZ41: 3-way motorised valve kit. The kit consists of a valve with its insulating shell, an actuator and the relative pipe fittings. It can be installed on fan coils with both right and left connections. If the valve is combined with the BCZ5 or BCZ6 condensate drain pan, to ensure a better housing it is possible to remove the 3-way insulating shell. The kit consists of a valve with its insulating shell, an actuator and the relative pipe fittings. It can be installed on fan coils with both right and left connections. If the valve is combined with the BCZ5 or BCZ6 condensate drain pan, to ensure a better housing it is possible to remove the insulating shell.

VCZ4124: 3-way motorised valve kit. The kit consists of a valve with its insulating shell, an actuator and the relative pipe fittings. It can be installed on fan coils with both right and left connections. If the valve is combined with the BCZ5 or BCZ6 condensate drain pan, to ensure a better housing it is possible to remove the 3-way insulating shell. The kit consists of a valve with its insulating shell, an actuator and the relative pipe fittings. It can be installed on fan coils with both right and left connections. If the valve is combined with the BCZ5 or BCZ6 condensate drain pan, to ensure a better housing it is possible to remove the insulating shell.

VCZ42: 3-way motorised valve kit. The kit consists of a valve with its insulating shell, an actuator and the relative pipe fittings. It can be installed on fan coils with both right and left connections. If the valve is combined with the BCZ5 or BCZ6 condensate drain pan, to ensure a better housing it is possible to remove the 3-way insulating shell. The kit consists of a valve with its insulating shell, an actuator and the relative pipe fittings. It can be installed on fan coils with both right and left connections. If the valve is combined with the BCZ5 or BCZ6 condensate drain pan, to ensure a better housing it is possible to remove the insulating shell.

VCZ4224: 3-way motorised valve kit. The kit consists of a valve with its insulating shell, an actuator and the relative pipe fittings. It can be installed on fan coils with both right and left connections. If the valve is combined with the BCZ5 or BCZ6 condensate drain

pan, to ensure a better housing it is possible to remove the 3-way insulating shell. The kit consists of a valve with its insulating shell, an actuator and the relative pipe fittings. It can be installed on fan coils with both right and left connections. If the valve is combined with the BCZ5 or BCZ6 condensate drain pan, to ensure a better housing it is possible to remove the insulating shell.

VCZ43: 3-way motorised valve kit. The kit consists of a valve with its insulating shell, an actuator and the relative pipe fittings. It can be installed on fan coils with both right and left connections. If the valve is combined with the BCZ5 or BCZ6 condensate drain pan, to ensure a better housing it is possible to remove the 3-way insulating shell. The kit consists of a valve with its insulating shell, an actuator and the relative pipe fittings. It can be installed on fan coils with both right and left connections. If the valve is combined with the BCZ5 or BCZ6 condensate drain pan, to ensure a better housing it is possible to remove the insulating shell.

VCZ4324: 3-way motorised valve kit. The kit consists of a valve with its insulating shell, an actuator and the relative pipe fittings. It can be installed on fan coils with both right and left connections. If the valve is combined with the BCZ5 or BCZ6 condensate drain pan, to ensure a better housing it is possible to remove the 3-way insulating shell. The kit consists of a valve with its insulating shell, an actuator and the relative pipe fittings. It can be installed on fan coils with both right and left connections. If the valve is combined with the BCZ5 or BCZ6 condensate drain pan, to ensure a better housing it is possible to remove the insulating shell.

VCF44 - 45 - for the secondary coil: The 3-way motorised valve kit for the secondary coil heat only. The kit consists of a valve with its insulating shell, actuator and relevant water fittings; it is suitable to be installed on the fan coils with right and left water connections.

VCZD: 2-way motorised valve kit. The kit consists of a valve, an actuator and the relative pipe fittings. It can be installed on fan coils with both right and left connections.

VJP: Control and balancing combination valve for 2 and 4 pipe systems to install outside the unit, supplied without fittings and hydraulic components. The valve, which can guarantee a constant water flow rate in the terminal, within its operating range.

(Heating only) additional coil

BV: Single row hot water heat exchanger.

Installation accessories

AMP: Wall mounting kit

DSC: Condensate drainage device.

BC: Condensate drip.

BCZ: Condensate drip. If the valve is paired with the BCZ5 or BCZ6 condensate drip tray, the insulating shell can be removed to ensure better housing.

Ventilcassaforma: Galvanised sheet metal template. It makes it possible to obtain directly in the wall a space for housing the fan coil.

MZA: Cabinet housing with fixed fins.

MZU: Cabinet housing with adjustable fins.

GA: Intake grid with fixed louvers

GAF: Intake grid with filter and fixed louvers

GM: Flow grid with adjustable louvers.

PA: Intake plenum in galvanised sheet metal, complete with suction couplings for circular-section ducts.

PAF: Intake plenum providing recovery and delivery on the same side, for all installations where the machine needs to be positioned outside the air conditioned rooms to minimise the noise levels and facilitate maintenance.

PM: Delivery plenum with circular flanges. Sandwich structure in hot galvanised steel, with interposed polyurethane foam (40 kg/m³). The panel is 15 mm thick. It is installed in place of the delivery panel with a rectangular flange, using the same 4 self-threading screws.

RD: Straight delivery coupling for canalisation.

RDA: Straight suction coupling for canalisation.

RP: 90° delivery coupling.

RPA: 90° suction coupling.

Accessories for ducting

MZC: Plenum with motorised dampers.

RDA_V: Straight intake connection with rectangular flange.

RPA_V: Suction plenum with rectangular flange; both sides have a circular push-out Ø 150mm that can be removed.

RDA_C: Straight intake connection with circular flanges.

PA_V: Suction plenum with circular plastic flanges; both sides have a circular push-out Ø 150mm that can be removed.

PM_V: Internally insulated delivery plenum with circular flanges; both sides have a circular push-out Ø 150mm that can be removed.

RPM_V: Internally insulated delivery plenum with rectangular flange; both sides have a circular push-out Ø 150mm that can be removed.

RDM_V: Straight delivery coupling in galvanised sheet metal.

RDM_C: Straight discharge internally insulated, with circular flanges.

22. CONTROL PANELS WITH MULTIFUNCTION ELECTRONIC THERMOSTAT

AER503IR

Flush-mounting thermostat with backlit display, capacitive keypad and infrared receiver, for controlling both brushless fan coils and those with an asynchronous motor. In 2-pipe systems, the thermostat can control standard fan coils or those equipped with an electric heater, with air purifying devices (Cold Plasma and germicidal lamp), with radiant plate or with FCZ-D twin delivery (Dualjet). In addition, it can control systems with radiant panels or mixed (fan coil and radiant floor) systems. Being equipped with an infrared receiver, it can, in turn, be controlled by the VMF-IR remote control.

PRO503

Wall box for AER503IR and VMF-E4 thermostats.

SAS

air probe kit ($L = 15 \text{ m}$) with probe-locking cable grommet.

SW3

Water probe ($L = 2.5 \text{ m}$) for controlling the minimum and maximum and to allow automatic seasonal switching for electronic thermostats fitted with water side changeover.

SW5

water probe kit ($L = 15\text{m}$) with probe-holder connection point, fixing clip and probe-holder from heat exchanger.

T-TOUCH-I

Touch control on board the machine, for controlling fan coils with brushless motors. In 2-pipe systems, it can control standard fan coils or those equipped with an electric heater, with air purifying devices or with FCZI-D twin delivery (Dualjet). In 4-pipe systems, only standard fan coils.

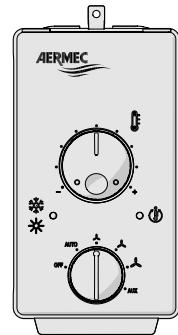

TX

Wall-mounting thermostat for controlling either brushless fan coils or those with asynchronous motors for 2/4 pipe. In 2-pipe systems, the thermostat can control standard fan coils or those equipped with an electric heater, with air purifying devices, radiant plate or FCZ-D twin delivery (Dualjet).

TXBI

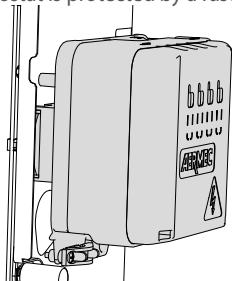

On board thermostat for fan coils 2/4 pipes of the FCZI series with brushless motor, complete with water probe and air probe to be positioned in the dedicated housings. The thermostat in 2-pipe systems it can control standard fan coils or those equipped with electrical resistors, with purification devices (Cold Plasma and germicidal lamp) with the radiating plate or with double flow FCZI-D (Dualjet).

23. CONTROL PANEL ACCESSORIES, THERMOSTATS AND VMF SYSTEM CONTROL DEVICES

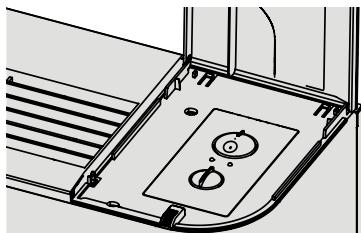

VMF-E19I:

Thermostat to be secured to the side of the fan coil, fitted as standard with an air probe and a water probe, it controls systems with 2 pipes, 4 pipes, 2 pipes + Cold Plasma, 2 pipes + UV lamps, 2 pipes + Heating element. Equipped with an external contact to be used as a remote ON-OFF at low voltage. By means of 2-wire serial communication, this thermostat allows for the creation of a single fan coil area (1 master + maximum 5 slaves). Compared to the previous model, thanks to a different dip switch configuration, it allows implementing new features: In systems with two pipes and a heating element - the latter can be activated as a complete replacement - allowing you to warm the environment exclusively with this accessory - Dualjet features are available in standard software and can be set via dip switch - Economy contact/presence sensor - Additional water sensor for overall control in 4-pipe systems (with VMF-SW1 accessory) - Serial RS485, ModBus RTU protocol, for centralised control - Possibility of inserting expansion boards for future developments. The VMF-E19 accessory must be therefore used in masters in the presence of multiple zones, or for communication with the chiller/heat pump - Compatibility with the VMF-IO accessory - Compatibility with VMF-LON expansion board. The thermostat is protected by a fuse.

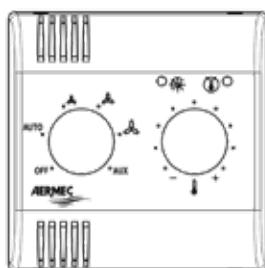

VMF-E2Z

User interface on the fan coil, with two selectors, one for temperature and the other for speed control; to be combined with accessories VMF-E0, VMF-E19, VMF-E19I.

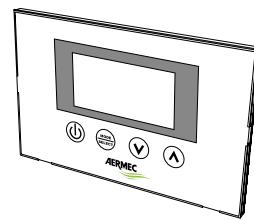

VMF-E3:

Wall mounted user interface, to be combined with accessories VMF-E19, VMF-E19I, VMF-E0X with grids GLF_N/M and GLL_N, can be controlled with VMF-IR control.

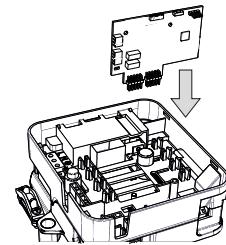

VMF-E4X

A wall-mounted user interface to be combined with VMF-E19, VMF-E19I, VMF-E24 ed VMF-E24I accessories. Featuring an innovative, extremely slim and cost-effective design, it allows running functions via a capacitive touchscreen keyboard with LCD display. You can choose to adjust the environment temperature with a panel-mounted sensor probe (standard), or with the VMF-E19/E19I probe, or through mediated reading. It also enables the activation of an air purifier (Cold Plasma/UV lamp) and a heating element. Light grey front panel PANTONE COOL GRAY 1C.

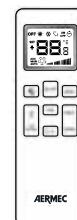

VMF-IO

Manage the unit exclusively from a centralized VMF control panel without area control panel

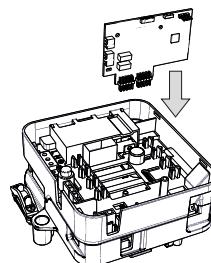

VMF-IR

User interface compatible with the AER503IR, VMF-E3 thermostat and with all the grids of cassettes equipped with the infrared receiver compatible with the VMF system.

VMF-LON

Expansion allowing the thermostat to interface with BMS systems that use the LON protocol.

VMF-SW

Water probe (L = 2.5m) used if required in place of the standard unit supplied with the VMF-E0X, VMF-E19 and VMF-E19I thermostats for mounting it upstream of the valve.

VMF-SW1

Additional water probe (L = 2.5m) to be used if required for 4-pipe systems with the VMF-E19 and VMF-E19I thermostats for maximum control in the cold range

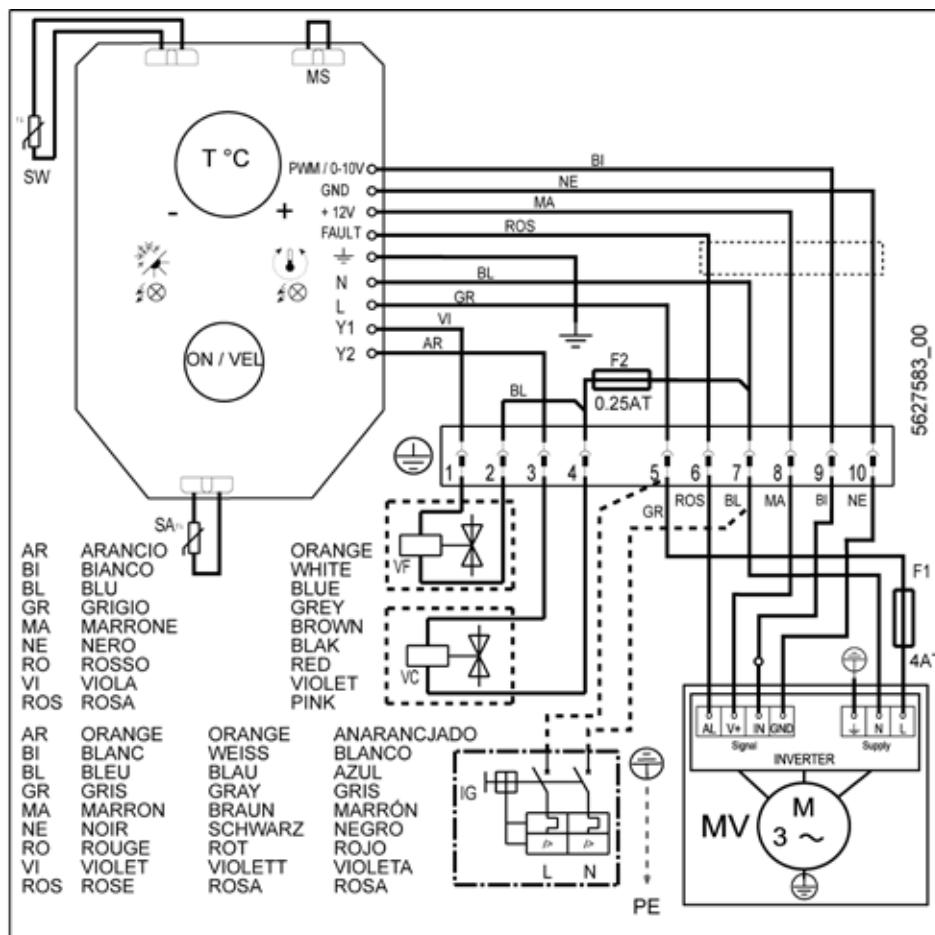

VMHI

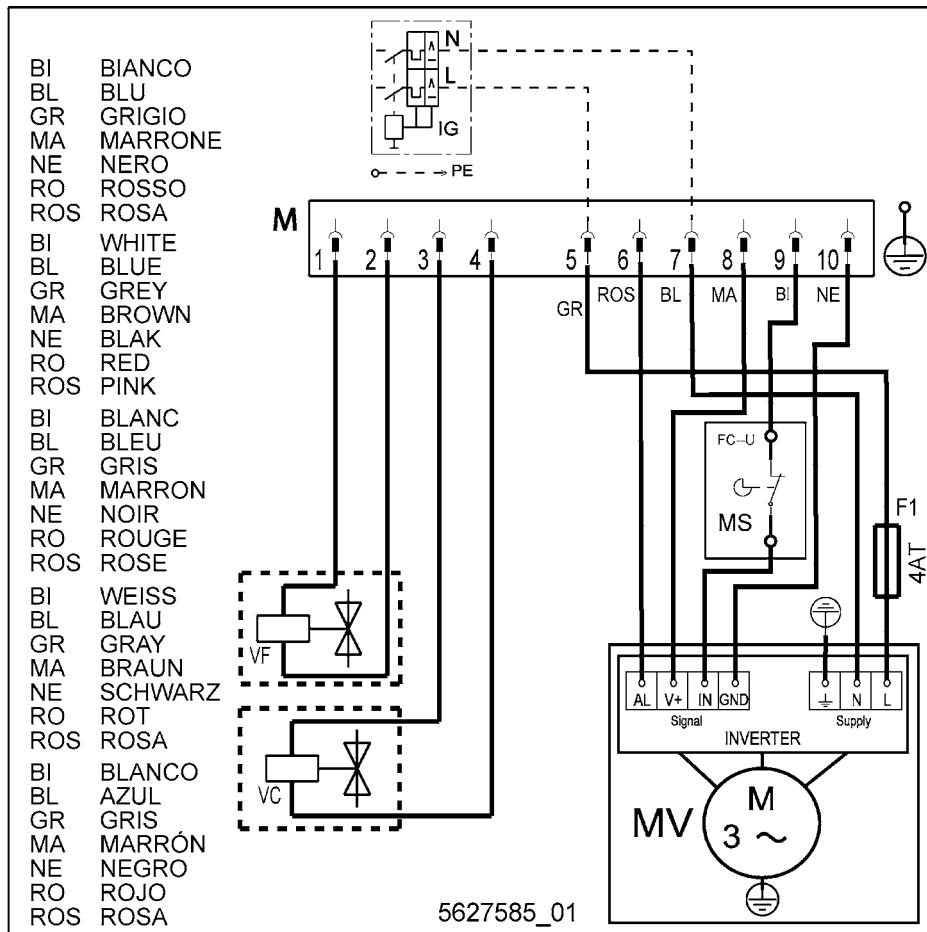

The VMHI panel can be used as a user interface for VMF-E0X/E19/E19I thermostats, GLFxN/M or GLLxN grids, or as an interface for the MZC system. What determines the function to be performed by the user interface is determined by its correct parametrisation and by following the electrical connections between interface and thermostat or interface and plenum.
